

THE POWER GAMER

"GEAR UP"

By The Colossus

This month In the Power Gamer I review some of my favorite weapons and equipment from: **Equipment & Gear Expansion Pack I**. These are just the things you need to give that extra edge in an H/20 game. So let us Gear up and Jump on in.

Clothing: (Acrobats Outfit) Loose fitting cloths that allow for easy of movement, these cloths grants a bonus to your acrobatics, climb and jump tests.

Light Sources: (Miners Helm) This helmet allows the wearer to have a light source without wasting a hand that could be used for a weapon, shield or the use of a skill that requires your hands.

Containers: (Bandolier) a strap of leather with 4 pouches and 6 potion vile loops, this piece of gear is helpful for carrying your light weight items in a place that is easy to get to and use.

(Mail-lined belt pouch) This simple looking pouch is lined with a Mail mesh which makes it harder for a thief to pick your pocket.

Adventuring Gear: (Animal Calls) small noise makers give you a bonus to your perform checks to imitate animals, also they are very good to use as signals when trying to remain hidden.

THE POWER GAMER JUNE 2008: "GEAR UP"

(Cutpurse rings) a ring that conceals a small blade that aids in picking pockets and purses.

(Long-Tongue lock picks and trap springing tools) These tools have longer handles and tool tips that allow the picking of locks and disarming of traps from a distance of up to 2".

(Iron Shod boots) These reinforced boots make it harder to injure ones feet and make the wearer immune to the effect of caltrops.

(Reinforced Cod-Piece) This extra padded, reinforced cod-piece makes the wearer immune to Dirty fighters.

(Studded Gauntlets) Allow the user to add his unarmed strike bonus to his defense.

(Trap-Springer's Monocle) this headpiece has a small magnifying device on it aiding in the disarming of traps.

Weapons: (Repeating Crossbow) This crossbow keeps its bolts in a 6 bolt clip, making reloading faster and easier so one can shoot and still stay mobile.

Ammo: (Signal Arrows) This arrow has a very loud whistle attached to it making it an excellent way of signaling an attack or distracting large groups of enemies.

(Grapple Bolts) These bolts are used to propel grapple hooks farther than a player can throw it. The only downfall is that these bolts can only be used in a Siege Crossbow.

Armor and Shields: (Bladed Buckler) This small shield is used by strapping it to ones forearm and is surrounded by blades which allow it to be used without the Shield Bash Talent without wasting a hand.

(Dwarven Siege Plate) This very heavy armor is thicker and heavier than normal heavy armor which gives it a higher defense bonus while still allowing it to be layered with lesser armor. The drawback is that it slows your speed by 1.

THE POWER GAMER JUNE 2008: "GEAR UP"

These are merely my favorite pieces of equipment contained in the ***Equipment & Gear Expansion Pack I***

There are many different pieces that are extremely useful. I hope that this has made you want to gear up with the best equipment you can have.

That is all for me so until next time I wish you Good food, Good friends and Good gaming.
