

TEN TERRIBLE TOXINS

Poisons to enhance your H/20 Fantasy Game

Poisons come in Three Classes (Venom, Manufactured or Magic) these are then broken down into Types (Injury, Ingested, Inhaled or Contact). All Poisons have one of the following Poison Rating (5, 10, 20 or 40). Complete rules

on Poisons can be found on page 130 of your H/20 Fantasy Guidebook. This will focus on a few varieties of Poisons available for use by or against PCs in Hacktastic D/20 Fantasy.

Use of Blade Venom Rules: All Blade Venom Poisons are considered of the Injury Poison Type. They require a (**S***) Action to apply to a Melee Weapon or a Single Piece of Ammunition. Blade Venom applied to a Melee Weapon stays in effect for One Encounter, Blade Venom applied to Ammunition is Single Use Only. One Dose of ANY Blade Venom is enough to treat One Melee Weapon or Three Pieces of Ammunition. When using a Melee Weapon or Ammunition Treated with a Blade Venom, ANY Natural 1 that occurs on an Attack Roll with the weapon means the wielder of the weapon has been exposed to the Blade Venom and must test vs the Rating of the Poison to see if he is effected.
